My research interests

- Peer-to-peer systems
- Content Distribution
- Mobile Cloud Computing
- Artificial Intelligence
 - Computational Advertising
 - Marketing Automation
 - Financial Computing

Mission Statement

- We study foundational scientific principles that enable network systems “*to make people reaching their interested information handily and efficiently*”.

Knowledge & Data Engineering

1) discover interested information, e.g., business intelligence for E-Commerce

Network System

2) publish information from the sources, e.g., social live, sending e-mail

3) obtain information at the destinations, e.g., watching Netflix, google search
