Spring 2022 Syllabus

This is an introductory computer science course for CS undergraduate students with specific focus on C and C++ programming language. Students will have gained knowledge of concepts behind object-oriented programming, and the ability to analyze and solve problems with CC+ using modern development tools, such as Cloud Platform, Remote E ditor and Git repository.

Topics

This course is an introduction to the concepts behind objectoriented programming, with emphasis on the C++ programming language. Topics include:

- 1. File I/O
- 2. Class Concepts
- 3. Operator Overloading
- 4. Pointers and Dynamic Arrays
- 5. Recursion
- 6. Inheritance
- 7. Polymorphism and Virtual Functions
- 8. Templates
- 9. Exception Handling
